As I said in the cards of my previous post, I've worked hard to get the samples out on time. That said, I didn't do as many test errors as I wanted, so there may be some errors (although I don't think there will be since I tried to catch them all and it used the same base as the student samples). So if you see anything wrong with the villain pattern (or even the student template), let me know so I can fix it as soon as possible! This goes for both PSD versions and online generators. Also if you guys have suggestions for more features/customizability, send them in and I'll see if I can add them. Also, a feature update I forgot to mention: a user mentioned having trouble uploading an image that was too large for the creator to handle. I added a feature to the generator to limit the file size to 2mb, but if anyone still has trouble uploading a giant image, let me know! Thanks in advance! Hope you guys have a great time using the new generator! An example of something done using the villain generator is in the queue, stay tuned! (You can probably guess who that is, though, gets the default of the villain generator...) -archivist generator ...)-storage house
